

TITAN-700 INTERCOM SYSTEM

The TITAN line is a completely new navigation line which combines proven techniques with the modern day technology. The TITAN line is based upon its predecessors, the Falcon and Sigma line and combines the analogue and digital techniques into an extremely versatile navigation line. The new TITAN line is suitable for the new build as well as the replacement market.

TITAN-700

The TITAN-700 main unit is an intercom operating on a two-wire system, which can be connected to a maximum of ten substations. This intercom system finds strength in simplicity, with intuitive controls and a basic layout. With all call functionality, selectable priority per channel and call possibility per channel, the TITAN-700 is a very complete intercom station.

Intercom main station

The TITAN-700 is an Intercom main station. TITAN stations with call-back option can be connected to the main unit of the TITAN-700 system. The system supports a maximum of 10 substations. The Intercom main station provides semi duplex communication with all substations and a general call is also possible.

Additions

Call buttons can be added at the stations. This allows for the person who is located near the TITAN-750 intercom to be notified. Also the P-707 foot switch and the P-704 Goose neck microphone can be connected to the intercom system.

Indicators

The chosen channel is announced by the LCD display, which can be dimmed by the use of a the general dimming function.

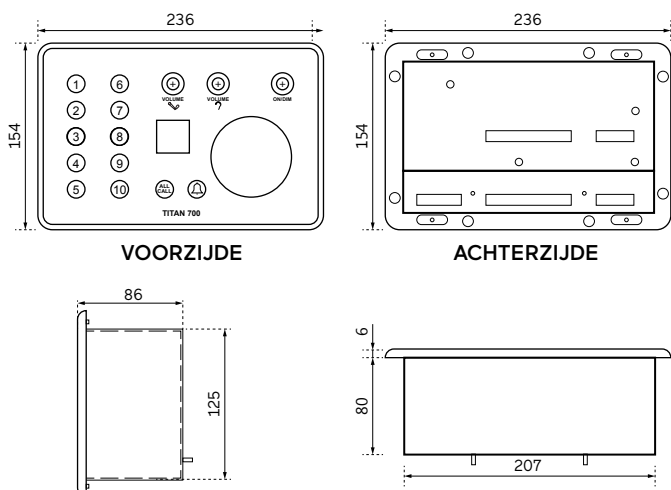

Specifications

Weight	Net weight 1,9kg
Protection	IP-50
Temperature/Humidity	0 to +55°C / 0 to 90% non-condensing
Main Supply / Backup	18-36VDC
Amperage	< 2A
Outputs	5 outputs for substation P-701 / P-702 / P 711 Alarm contact 24VDC 1 A P-710 interface box
Inputs	Input for goose neck microphone Input for P-707 foot switch

Peripherals

- P-701: Outdoor speaker
- P-702: Indoor speaker
- P-707: Foot switch
- P-711: Engine room set
- P-705: Push button IP67
- P-704: Goose neck microphone
- P-710: Interface box
