

Smooth Sailing Ahead with **+PLANNER**

Stay ahead of the curve and ensure full compliance with our innovative +Planner, an advanced marine data system for seamless voyage planning. Access up-to-date Navigational Information effortlessly, putting essential data at your fingertips.

The +Planner offers a distinctive service for official UKHO AVCS charts, integrating vital information from ADPs & AENPs to enhance and streamline your voyage planning process. Our ADMIRALTY Nautical Digital Publications, including Charts and ADP – AENP, are available through two flexible subscription options:

- Pay As You Sail (ePAYS) and
- Flat Fee (FF).

ECO
friendly

Pay As You Sail Subscription (ePAYS):

Automate your passage planning with ePAYS, ensuring vessels utilize the correct scale ENC for safe navigation. Experience minimal administrative handling both onboard and onshore, as all necessary charts are readily available when needed, requiring no additional actions.

Flat Fee Subscription (FF):

Enroll in our FF subscription and enjoy access to all charts and publications tailored to the size of your vessel, following a fair use policy. This subscription eliminates the hassle of individually ordering charts, providing a comprehensive solution for your maritime needs.

Fair Use Policy (FUP):

Under the FF subscription, you have the flexibility to order only the data relevant to your actual voyage, with any additional data incurring separate charges. For quality assurance, Radio Holland reserves the right to request berth-to-berth route planning to validate data consumption.

Embark on a confident journey into the future with +Planner as your trusted companion for streamlined, compliant, and stress-free maritime voyage planning. Reach out to us for additional details and a tailored solution that suits your specific needs.
